Release date: June 20, 2019

Expiration date: June 20, 2020

Pulmonary hypertension (PH) comprises a group of disorders that reflect an increase in pulmonary arterial pressure. The World Health Organization (WHO) has identified 5 etiologies/types of PH, based on the underlying pathological mechanisms. Initial symptoms of PH are shortness of breath (which often comes on precipitously) and exertional dyspnea. Left untreated, PH ultimately leads to right-heart failure.

Release date: November 12, 2019

Expiration date: November 12, 2020

Dual Antiplatelet Therapy in Coronary Artery Disease: New Guidelines and Beyond will review the 2016 ACC/AHA guideline update for the use of DAPT in CAD and outline the real-world evidence for these recommendations. In addition, the activity will discuss the findings from studies completed after the guidelines were published that clinicians may find useful when developing individualized DAPT management strategies for their patients with CAD

Release date: February 12, 2020

Expiration date: February 12, 2021

This CME activity, ***“Understanding the Rationale for Newer IL-17-Targeted and Emerging Psoriatic Arthritis Therapies: Essentials for Clinicians,”*** will help participants recognize and understand the role of IL-17 in the pathophysiology of PsA.
